

The Pinnacle
Portland, Oregon

Courtyard Landscape

Centered on the northern gateway into the River District, The Pinnacle demanded a unique design approach that is responsive to the site being a bridge between the Willamette River Parkway and the proposed public park to the West. The courtyard will be enclosed on two sides by a 12 story and 7 story tower. A single story retail pavilion will anchor the opposing corner of the site. The retail pavilion roof top is designed as a greenroof that will provide interest for the condominium units above. The towers offers Cascade Mountain range and Willamette River views. This courtyard is open to the public allowing circulation through a dynamically composed urban courtyard landscape. The courtyard features grand arcing planter walls, geometric plantings, large raised private terraces and custom lighting features.
